Message from the Guest Editors

Dear Colleagues,

The 18th ICMCF will keep with past traditions by providing an interdisciplinary program that will highlight research efforts in understanding and combating biofouling and corrosion of materials and structures immersed in the marine environment. The ambition of this congress is to bring experts from around the world providing the latest basic and applied research advances in biology, microbiology, chemistry, physical chemistry, coatings, and materials to help meet these challenges. This Special Issue presents a selection of papers from the conference; the papers both give insight into current research and commercial developments and highlight some of the areas where further research is required.

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
