submissions:

closed (20 January 2022)

Message from the Guest Editor

Dear Colleagues,

The ocean is one of the most important reservoirs of hydrogen, carbon, nitrogen and phosphorus on the Earth. Knowing the origin, distribution, circulation and impact of hydrogen, carbon, nitrogen and phosphorus in the ocean is of first-order importance to our understanding of the origin and evolution of the ocean, ocean–lithosphere interaction, ocean dynamics, marine environment, and the evolution of the Earth as a habitable planet. Furthermore, these elements in the oceans can enter the Earth's interior, delivered by the subduction of oceanic crusts, which, in turn, affect various geological processes and geodynamics in the deep Earth. For this Special Issue of *Marine Geology*, we sincerely invite researchers from different disciplines to submit original/review articles, including but not limited to the experiment and theory of these key elements in oceans and the Earth interior, from petrological, geochemical, geophysical, and oceanographic perspectives, to better understand the origin, distribution, transport and impact of these key elements in the ocean.

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q1 (Ocean Engineering)
