Deadline for manuscript  
submissions:

**closed (31 December 2019)**

### Message from the Guest Editor

Dear Colleagues,

We are inviting submissions to a Special Issue of the *Journal of Marine Science and Engineering* on the subject of “Renewable Energy Extraction in the Marine Environments and Its Coastal Impact.” Marine areas are among the most sustainable environments from the point of view of energy potential. Historically, these areas have significantly influenced global economic growth through ship transport, and current technological developments recommend them as very competitive in the context of renewable energy resources. Various research directions are being pursued at the moment, among which we can mention the possibility of developing co-located projects or assessing the role of the marine farms in coastal protection. This Special Issue is intended to provide a forum for academic researchers and technical professionals to exchange their recent works on technological advancements.

Dr. Florin Onea  
*Guest Editor*

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

*Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312)* focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
