Deadline for manuscript  
submissions:

**closed (1 April 2022)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on the challenges, considerations, and, most importantly, progress in the realm of scaling up macroalgal production. The cultivation of macroalgae has the potential to fulfill many of the United Nations Sustainability Goals and simultaneously reduce pressure on natural standing stocks, yet many barriers remain that have prevented the expansion of production to commercially relevant scales. Therefore, we invite contributions from researchers in both academia and industry that report or review the progress and future directions of scaling up macroalgal production. The scope of the Special Issue covers all methods and stages of macroalgal production. This includes, but is not limited to, the areas of ocean farming, offshore production, seaweed hatcheries, seed stock production, disease prevention, biorefining, cost efficiency, and processing. Particularly welcome are contributions related to scaling up land-based production.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Engineering, Marine*) / CiteScore - Q2 (*Ocean Engineering*)
