Message from the Guest Editors

Dear Colleagues,

Marine transportation accounts for 90% of the logistics around the globe, and marine ports serve as the hubs of the marine shipping services. Port logistics refers to the central port city using its own advantages, relying on the advanced software and hardware environment, strengthening its radiation ability to the logistics activities around the port, and developing a comprehensive port service system with the characteristics of covering all links of the logistics industry chain. During the COVID-19 pandemic, ports suffered from complicated and serious problems in logistics. Owing to the port congestion and crew exchange, the cost of shipping and ocean freight soared. As the front end of the port logistics industry, the rise and fall of port international shipping business is also closely related to the rapid development of the port logistics industry. Therefore, this Special Issue aims to collect the latest scientific research based on the development of port logistics industry, hoping to provide technical support or operation management level reference for relevant port managers.

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
