Message from the Guest Editor

Dear Colleagues,

Marine science concern the most vast area of the Earth; ‘ocean’ as a subject of study where various human activities take place and make an impact at national, regional, and global levels. This Special Issue will bring together research that focuses on the role of women in marine science in advancing sustainable development of the country, region, and globe. It will also address the need of a new approach to support technology and innovation in research through gender equality. Contributions could be workforce-oriented papers addressing the challenges and opportunities faced by women in marine science, or policy-oriented papers addressing institutional problems and/or good practices in promoting women in marine science.

Papers should seek to move forward thinking and understandings in the field theoretically or empirically. Both male and female authors are welcome to submit their contributions, addressing following issues, but not limited to:

- The role of women in marine science to advance research and innovation
- Impact of women in marine science
- Career pathways into marine science

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
