Message from the Guest Editors

Dear Colleagues,

In this Special Issue we would like to collect contemporary papers with topics including, but not limited to, interactions between waves and ocean structures. The wave theory can include effects from ocean structures. Various ocean structures can be included, such as fixed, movable, porous, flexible, free-floating, or with moorings. We are particularly interested in coupling between waves and structures emphasizing effects on wave fields or motions of the structure. As for the research methodology, it can be analytical, numerical, or in situ data analysis. New findings are especially welcome. With the increasing development of natural energy such as solar, current, or wave energy, new types of ocean structures interacting with ocean waves could also be an interesting topic. We encourage you to contribute to this Special Issue, and to help make this Issue successful.

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)
