

## Special Issue

# Analytical and Experimental Technology for Marine Gas Hydrate

### Message from the Guest Editors

Marine gas hydrates have attracted widespread attention from governments and researchers around the world, not only because they are considered the most promising clean energy due to their enormous resources, but also because they may cause environmental impacts such as submarine landslides and methane leaks. At present, there are still some core issues that urgently need to be solved in gas hydrate-related research. Analytical and experimental techniques are an important means to solve these problems. Microscopic testing techniques can help obtain information about marine gas hydrate characteristics at the millimeter, micrometer and even nanometer scales. Experimental techniques can help obtain important physical parameters of marine gas hydrates by simulating the marine environment, providing basic data for hydrate resource exploration, development and environmental effect research. In recent years, analytical and experimental techniques have been widely applied in hydrate research, achieving significant results.

### Guest Editors

Prof. Dr. Changling Liu

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei  
Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean  
Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 15.6 days after  
submission; acceptance to publication is undertaken in 1.9  
days (median values for papers published in this journal in  
the first half of 2025).
