

Special Issue

Multi-Hazard Effects and Mitigation Strategies for Offshore Structures: Advances and Challenges

Message from the Guest Editors

This Special Issue aims to address the complex and multifaceted challenges associated with the design, assessment, and mitigation of the risks posed to offshore structures by multiple environmental hazards. Offshore wind turbines, sea-crossing bridges and floating structures are increasingly subjected to a variety of hazards, including environmental loads (seismic, wind, wave, ice, etc.), local sour, and man-made risks. The interactions among these hazards can result in compounded effects, often leading to unexpected vulnerabilities that require innovative strategies to ensure the safety, reliability, and sustainability of offshore structures. This Special Issue welcomes contributions that explore the impact of multiple hazards on offshore structures, as well as innovative strategies for mitigating these risks. The aim of this Special Issue is to provide a comprehensive collection of state-of-the-art research and practical solutions that provide engineers, researchers, and industry stakeholders with insights that could enhance the resilience of offshore structures against a wide array of environmental and operational challenges.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering (JMSE, ISSN 2077-1312)* is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering and The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
