

Special Issue

Sustainable Shipping: Alternative Fuels and Technologies for Marine Applications

Message from the Guest Editors

Maritime transport is extremely important for world trade, as more than 90% of world trade is carried out by sea. Consequently, fuel consumption and emissions from maritime transport continue to increase, which undoubtedly also contributes to climate change. Therefore, the shipping industry is under increasing pressure to act upon the Paris Agreement and reduce green-house gas (GHG) emissions. The substantial emission reductions which must be achieved over the next decades are expected to drive technology development and, in particular, the introduction of alternative fuels. There are many options for alternative fuels such as biodiesel, hydrogen, ammonia, methane and methanol. Substantial investment is being put into researching safe and economically feasible alternative carbon-neutral fuels and into developing fuel technologies. We therefore invite you to submit articles based on laboratory and field experiments, including, but not limited to, the following topics: LNG; LPG; Biofuels; E-fuels; Technologies and solutions helping minimize the negative impact of shipping: carbon capture and storage technologies, scrubbers, treatment technologies, etc.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
