Offshore Wind Farms and Climate Change

Message from the Guest Editor

Offshore wind has been expanding rapidly in the past decade, with over 50 GW of global installed capacity as of 2022, corresponding to a growth by a factor of 10 in 10 years. Offshore wind farms tend to have taller and larger turbines, higher installed capacity, and larger spacing and areal extent than onshore. The wakes of offshore wind farms can travel several tens of kilometers downwind horizontally while also expanding downward to the ocean surface and upward to the upper parts of the marine boundary layer and beyond. Although the direct impacts of offshore wind farms on the surrounding environment and on the climate are not expected to be large on average, especially when compared with the long-term climate and health indirect benefits of wind energy as an alternative to fossil and fissile fuels, undesirable consequences may occur locally and/or occasionally, such as changes in turbulence, ocean surface stress, etc.,[...] For further reading, please follow the link to the special issue Website at:

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
