

Special Issue

Sustainable Operations in Maritime Industry

Message from the Guest Editors

With specific reference to maritime operations, the International Maritime Organization (IMO) noted with concern that the health of oceans and marine biodiversity are negatively affected by marine pollution from a number of land-based sources, including vessels and ports. To sustain the development of maritime transportation, “sustainable maritime,” which operates with a good balance between environmental impact and economic interests, has been the focus of marine industries and government agencies and are required to look into energy saving and reducing the impact of their operations on society and the environment. This Special Issue on “Sustainable operations in maritime industry” to be published in the *Journal of Marine Science and Engineering* aims to bring together recent theoretical, applied or methodological advances concerning operations in the sustainable maritime industry, no matter they are hardware, software, or innovative approaches related, and encourage the researchers in maritime studies to have deep thoughts to make the maritime industry sustainable and green. Both research and review papers are welcomed.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
