

Special Issue

Sustainable Operations in Maritime Industry

Message from the Guest Editors

With specific reference to maritime operations, the International Maritime Organization (IMO) noted with concern that the health of oceans and marine biodiversity are negatively affected by marine pollution from a number of land-based sources, including vessels and ports. To sustain the development of maritime transportation, “sustainable maritime,” which operates with a good balance between environmental impact and economic interests, has been the focus of marine industries and government agencies and are required to look into energy saving and reducing the impact of their operations on society and the environment. This Special Issue on “Sustainable operations in maritime industry” to be published in the *Journal of Marine Science and Engineering* aims to bring together recent theoretical, applied or methodological advances concerning operations in the sustainable maritime industry, no matter they are hardware, software, or innovative approaches related, and encourage the researchers in maritime studies to have deep thoughts to make the maritime industry sustainable and green. Both research and review papers are welcomed.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
