Roles of Marine Invasive Species on Local Habitat Sustainability and Food Web

Message from the Guest Editors

Invasive species represent a risk for biodiversity worldwide, and in fact can lead to a loss of local biodiversity with the extinction of indigenous species as well as ecosystem imbalances and shifts. Furthermore, some species are a threat to economy and human health (e.g., damage to fishing gear and marine products; injuries and poisonings that can be lethal). The aim of this Special Issue is to collect valuable research focusing on the impact that invasive alien species can have on marine habitats, with particular emphasis on the sustainability and trophic relationships of marine invasive species in the new colonized habitat and ecosystems. Original and high-quality research works related to these aspects are encouraged. Those exploring the relationship between the effect of IAS on fisheries and thus ecosystems are also highly welcome.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
