Challenges and Opportunities of Maritime Transport in the Post-Epidemic Era

Message from the Guest Editors

Since the outbreak of COVID-19 epidemic, the demands for maritime transport has experienced unprecedented fluctuations. The demand for maritime transport has dropped rapidly after reaching its peak, but has not yet stabilized. There are several basic problems in the analysis and modeling of maritime transport in the post-epidemic era that deserve further study. The purpose of this study is to explore the challenges and opportunities of maritime transport in the post-epidemic era (especially engineering and technology), and to elaborate the basic theory, technical methods, field practice and technical frontier of optimization modeling. This research topic will collect comprehensive review articles and original research articles of any scientific work and basic research, including the theme of "challenges and opportunities of maritime transport in the post-epidemic era".

- Maritime efficient transport infrastructure (emergency response and safe operation)
- Maritime intelligent transport systems (port automation and ship visualization)
- Environmental risks in maritime transport (vessel-source pollution and ecological port)

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
