

Special Issue

Ecotoxicological Effects and Risk Assessment of Environmental Pollutants on Marine Organisms

Message from the Guest Editors

One of the main areas of investigation is environmental pollution, particularly in aquatic environments. Environmental pollutants cause detrimental effects in both the adult phase and during development (as in larvae and fry) by penetrating and spreading across trophic webs. There is a steady rise in the quantity of novel environmental pollutants that affect aquatic environments. Furthermore, their potential to have hazardous effects when combined with other contaminants presents a serious risk to public health. We specifically need review articles and original research that address the processes involved in the effects of pollutants on marine species and the marine environment. Publication of high-quality research studies directly pertaining to the following issues is encouraged. Innovative methods for research are welcomed.

- Marine pollutants;
- Environmental Risk Assessment;
- Aquatic ecotoxicology;
- Effects on aquatic organisms.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
