

## Special Issue

# Marine Industry and Regional Development – Maritime Roadmap Up to the Future

### Message from the Guest Editors

Maritime transport is one of the most important marine industries that play a prominent role in the socio-economic development of most coastal regions all over the world. Shipping undertakes more than 70% of international trade and provides huge promotions to regional and global economies. On the other side, as the important nodes in logistics networks, ports behave as the crucial engines for regional economies and social development. In recent decades, there has been rapid progress in the maritime industry in terms of new technologies, ideas, approaches and operation modes. Meanwhile, some global issues, e.g., climate change, the COVID-19 pandemic and the world economy recession, propose more challenges to the sustainability of the maritime industry. In order to better understand the interactions between the maritime industry and regional development in the new dynamic environment, it is necessary to place more attention on the related research topics.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312)* focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
