

Special Issue

Hydroacoustic Study of the Ocean

Message from the Guest Editor

We would like to invite you to contribute to the Special Issue “Hydroacoustic study of the Ocean”. Sound waves can travel large distances without loss and reflect from the biological organisms and physical objects with echoes characteristic of such objects. The physical properties of the sound in the water make it an important and effective method for aquatic monitoring and ocean study. Recent decades of research and development produced significant progress in the development of scientific acoustic echo sounders, sonars and current profilers. Modern sensitive hydrophones allow monitoring of geological, biological and human activity in the ocean. Hydroacoustic methods also have been proven successful for marine studies and monitoring in ice-covered seas. This Special Issue aims to provide an overview of the recent progress in using acoustic methods in ocean monitoring and the study of geophysical, anthropogenic and biological processes. We also encourage submissions on applications of new methods and techniques that contribute to the further development of the hydroacoustic study of the Ocean.

Guest Editor

Dr. Vladislav Y. Petrusevich

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
