

Special Issue

Sustainable Seas: Addressing Challenges in Global Fisheries Management

Message from the Guest Editor

This Special Issue focuses on global fishing, exploring technological innovations, emerging practices, fish stock management, environmental and ecosystem impacts, international governance and policies, social sustainability in coastal communities, and regional case studies. It aims to provide a comprehensive overview of the challenges and corresponding solutions in sustainable fishing, fostering debate among researchers, marine resource managers, and policy makers. This Special Issue seeks to promote the dissemination of advanced knowledge and advocate innovative strategies to ensure the long-term health of marine ecosystems and the well-being of the communities dependent on them. Topics of interest include fishing techniques, yield rates, and bycatch mitigation efforts. I invite submissions of original, high-quality research papers addressing these topics, aiming to advance our understanding and practices in sustainable fishing. Contributions that offer innovative approaches, insightful analyses, and practical solutions are encouraged.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering (JMSE)*, ISSN 2077-1312 is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
