Biodiversity and Population Ecology of Marine Invertebrates

Message from the Guest Editors

Marine invertebrates are essential components of coastal and ocean ecosystems. Their biodiversity is astonishing, with thousands of species inhabiting oceans and seas worldwide. Understanding this diversity is crucial for assessing the health of marine ecosystems and identifying conservation priorities. Moreover, marine invertebrates offer unique insights into the impacts of environmental change and anthropogenic activities on our oceans. Their pivotal roles in ecological dynamics and the intricate relationships they form within these habitats underscore the significance of studying their biodiversity and population ecology. By investigating their biodiversity and population ecology, we aim to enrich our understanding of these vital creatures and contribute to the preservation of the oceans' delicate balance. Contributions should delve into various aspects of marine invertebrates, encompassing taxonomic, ecological, and evolutionary perspectives. Submissions should emphasize the complex interactions within and between invertebrate species, their adaptations to changing environments, and their implications for ecosystem health and sustainability.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
