

## Special Issue

# Advanced Studies in Emerging Algal Toxins

### Message from the Guest Editors

Dear colleagues, This Special Issue focuses on different aspects on the study of marine biotoxins as natural contaminants of the marine environment. The recent transition from the mouse bioassay to chemical methods for the control of natural toxins represents an important advancement, not only in terms of increasing the sensitivity and selectivity required for these particular toxins, but also to ensure the analytical reliability and even the potential for confirming the toxic analogues involved in the contamination. On the other hand, the impact caused by new or emerging toxins in areas where this natural phenomenon caused by harmful algal blooms occurs is of increased importance worldwide. These important aspects of advances in methodological approaches for the determination of algal toxins with special emphasis on new or emerging toxins of relevance and also the determination of the organisms involved on the toxic production, toxicological advances, etc. We encourage contributions from young investigators, doctorate students and postdocs presenting their research findings in the area of emerging toxins.

### Guest Editors

Prof. Dr. Ana Gago-Martínez

Department Analytical and Food Chemistry, Biomedical Research Center (CINBIO) Universidade de Vigo, 36310 Vigo, Spain

Dr. José Leao

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei  
Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean  
Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 15.6 days after  
submission; acceptance to publication is undertaken in 1.9  
days (median values for papers published in this journal in  
the first half of 2025).
