

Special Issue

Advances in Autonomous Underwater Robotics Based on Machine Learning

Message from the Guest Editors

In recent years, the use of autonomous or semi-autonomous robots to perform underwater missions has grown rapidly. Tasks such as submersed infrastructure inspection, the monitoring of underwater plants and algae meadows or general sub-sea mapping strongly benefit from underwater robotics. Increasing robots' autonomy is tightly related to the use of artificial intelligence techniques. Among them, machine learning in general and deep learning in particular have shown great potential, though still few applications exist which are specifically targeted to underwater robotics. The purpose of this Special Issue is to publish innovative research and application-oriented works related to underwater and marine robotics uses of machine learning in particular.

- Marine and underwater sensor processing using machine learning and deep learning;
- Marine and underwater localization/SLAM using machine learning and deep learning;
- Marine and underwater navigation using machine learning and deep learning;

Papers investigating other artificial intelligence fields not necessarily related to machine or deep learning can also be taken into consideration.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
