

Special Issue

Advances in Marine Logistics, Shipping, and Ports

Message from the Guest Editor

This Special Issue is dedicated to the multidisciplinary field that focuses on improving the efficiency and sustainability of maritime logistics systems. This area of study is closely linked to the growth of international trade and globalization. Over the years, the field has evolved to address various challenges such as the increasing size of vessels, changing environmental regulations, and the need for greater efficiency in the field. This field aims to enhance the effectiveness and efficiency of marine logistics by developing innovative technologies and methodologies. The scope of this field includes a range of topics, such as simulation, AI, automation, big data analysis, IOT and information platform in the areas of shipping, ports, and logistics. We invite researchers in these areas to submit papers that address the challenges and opportunities of marine logistics, shipping, and ports, and provide innovative solutions in order to improve the efficiency and sustainability of maritime transportation. We are particularly interested in papers that combine theoretical analysis with practical applications and offer insights into the latest trends and developments in the field.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
