

Special Issue

New Research Advances on Marine Invertebrates

Message from the Guest Editor

Marine ecosystems encompass a wide variety of invertebrates, pelagic and benthonic, from intertidal to deep-sea habitats in polar to tropical regions. In addition to their high environmental importance, some marine invertebrates also have great economic value. However, despite all the research made so far, much still remain to be investigated about these animals. A large variety of classical and novel research methodologies can be used to obtain new advances in our understanding of marine invertebrates and their relationships with the environment, including the effects caused by climatic changes on marine invertebrate communities. Microscopy, molecular biology, chemical and biochemical studies can provide valuable new knowledge about these animals. This special issue aims to collect articles providing new and relevant information on a variety of subjects regarding marine invertebrates, including ecology, morphology, physiology, biodiversity, pathology, evolution, reproduction, development and others.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
