

Special Issue

New Techniques and Equipment in Large Offshore Aquaculture Platform

Message from the Guest Editors

This special issue introduces the latest progress in far-reaching marine aquaculture technology and equipment from the aspects of far-reaching marine aquaculture varieties, aquaculture technology, environmental control technology, aquaculture equipment, and large-scale aquaculture platform construction technology. Specifically, the content of this special issue includes far-reaching marine aquaculture varieties and their aquaculture technologies, the influence of environmental stress on aquaculture varieties in complex aquaculture scenarios, the coupling motion characteristics of tank breeding platform and tank in wave environment, and the construction technology of safe and fish-suitable structure of far-reaching sea aquaculture platform, etc. This issue focuses on the development and progress of new aquaculture technologies and equipment through the latest research on the far-reaching marine suitable varieties and aquaculture facilities. These results will lead to further research and the extension of these techniques to other areas and species of aquaculture.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
