

Special Issue

Advanced Remote Sensing Engineering Applied in the Environmental Monitoring of the Coasts

Message from the Guest Editors

In recent years, coastal environmental problems, such as red tides and sediment runoff, have been attracting a great deal of attention once again. Remote sensing has played a major role in understanding such wide-area phenomena. In addition, rapid advancements have been made in remote sensing technology. The purpose of this Special Issue is to publish cutting-edge research and reviews regarding these subjects and contribute to the solution of coastal environmental problems. Keywords: remote sensing; red tide; sediment runoff; seagrass; blue carbon; coast

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
