

## Special Issue

# Recent Advances in Estuarine Monitoring and Management

### Message from the Guest Editors

Recent advancement of field measurement techniques, as well as progress in numerical simulation and physical modelling methods, has enabled to make more detailed and comprehensive monitoring and management of estuaries for various aspects, with a range of practical applications including flood control, navigation channel maintenance and environmental issues. The aim of this special issue is to bring together a diverse group of leading researchers from the entire world. As seen in the attached list of potential authors, there are so many candidates from various countries as a paper author in this field of study. Potential topics include, but are not limited to: river mouth morphology coastal erosion sedimentation environmental changes salt intrusion geology remote sensing

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei  
Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean  
Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 15.6 days after  
submission; acceptance to publication is undertaken in 1.9  
days (median values for papers published in this journal in  
the first half of 2025).
