Advances in Marine Propulsion II

Message from the Guest Editor

Dear colleagues, Following the success of the first edition of the Special Issue "[Advances in Marine Propulsion](#)", this second Issue aims to promote and publish new findings and technologies related to marine propulsion. Researchers are cordially invited to contribute findings and progress in the broader areas of marine and ocean engineering with emphasis on marine propulsion, power, energy and renewables as well as autonomous systems and watercraft, ocean robotics, mechatronics, electromechanics, dynamics and control. The fields of research may include, but are not limited to, the following: digital signal processing, control theory, process modeling and simulation, system identification, dynamics and control, reliability and signal and data analysis.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.
