# Marine Ecology and Water Quality Monitoring

## Message from the Guest Editors

Marine water quality is of fundamental importance for all plants and animals that inhabit it. It also affects the quality and quantity of food that human beings can harvest from the ocean. It is critically important to conduct the monitoring of marine water quality to ensure that both the causes (contaminants) and their effects on the ecosystem can meet the regulatory requirements. This monitoring process can also be used to identify the trends of environmental and ecological changes as a consequence of multiple factors, including anthropogenic impacts.

# Message from the Editor-in-Chief

The Journal of Marine Science and Engineering (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

## Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

### **Author Benefits**

## **High Visibility:**

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
