# Monitoring and Assessing the Changing Coastal Ecosystem in Response to Global Change

## Message from the Guest Editors

The health of the coastal marine ecosystem is declining, and the sustainability of the sea is facing serious challenges. In order to facilitate a sustainable approach to ocean governance and achieve the goal of highquality socio-economic development, the evolution of the marine ecosystem under multiple drivers, which usually shows multi-scale variability, must be understood. Monitoring and predicting coastal processes are, therefore, of increasing importance. This Special Issue aims to present the recent advances in monitoring, simulating and assessing coastal eutrophication and ecosystem response. We welcome contributions from the application of novel observational and experimental technologies, the development of ocean data and products, assessment of ecological health risks, numerical studies with theoretical or physical-biogeochemical models, and process studies including but not limited to harmful algal blooms, hypoxia and coastal acidification.

## Message from the Editor-in-Chief

The Journal of Marine Science and Engineering (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

#### Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

#### **Author Benefits**

#### **High Visibility:**

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
