

Special Issue

Nonlinear Wave Dynamics and Wake Structure

Message from the Guest Editor

The nonlinear dynamics of water surface waves demonstrates a great variety of manifestations. Experimental studies of the last two decades have revealed a number of new effects in the behavior of waves, which urgently require their proper theoretical study. Nonlinear dispersion of waves, well studied in weakly nonlinear models, still remains the object of active research in completely nonlinear wave models. The specific task of this issue is the study of highly nonlinear and dissipative processes, the transformation of breaking waves, and the evolution of the wave spectrum in the deep-water and coastal zones of the sea. The propagation of surface waves is usually accompanied by the influence of wind, coastal currents, tides, etc. Another theme of the issue is a radical change in the behavior of waves in the presence of the indicated “external” influences. The ship’s wake is one of the most striking examples of sea waves observed directly in natural conditions. One of the topics of the issue is the study of the structure of the ship’s wave wake under the influence of currents and wind in the coastal zone and in the open ocean.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
