

Special Issue

Biodiversity and Population Ecology of Marine Invertebrates—2nd Edition

Message from the Guest Editors

Marine invertebrates are essential components of coastal and ocean ecosystems. Their biodiversity is astonishing, with thousands of species inhabiting oceans and seas worldwide. Understanding this diversity is crucial for assessing the health of marine ecosystems and identifying conservation priorities. Building on the strong response and scientific interest generated by the previous volume, this second edition of the Special Issue continues to highlight advances in the biodiversity and population ecology of marine invertebrates. Our aim is to further expand the scientific dialogue and enrich our understanding of these vital organisms and their ecological functions. Original research articles and reviews are welcome. Submissions should emphasize the complex interactions within and between invertebrate species, their adaptations to changing environments, and their implications for ecosystem health and sustainability. Authors are encouraged to explore innovative methodologies, report new species or taxonomic insights, and share empirical research that can further our knowledge and guide future conservation efforts.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
