

Special Issue

Sediment Dynamics in Artificial Nourishments—2nd Edition

Message from the Guest Editor

Artificial nourishments are a coastal erosion mitigation strategy that allow for a decrease in negative budgets by adding sediment to the coastal system. However, due to the complexity of coastal processes, sediment dynamics after intervention present difficult evaluations. Research on improving the understanding of these complex processes was presented in the first edition of the Special Issue dedicated to Sediment Dynamics in Artificial Nourishments. The Special Issue received very positive reactions, confirming the relevance of the theme, ending with twelve manuscripts published.

This new edition of the Special Issue accepts significant research on cross-shore and longshore nourished sediments distribution, turbulence and suspended sediments perturbations, biological impacts, monitoring works and sand tracing, shoreline evolution impacts after nourishments, longevity of the nourishments, and artificial nourishment interaction with other coastal structures or nature-based solutions. This new edition Special Issue aims to reinforce the importance of the research developed in understanding sediment dynamic processes related to artificial nourishments.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
