

## Special Issue

# Abundance and Diversity of the Sea Fish Community

### Message from the Guest Editor

Although there are a few common patterns of behavior that can often be related to various types of fish, each species has its own specific habits and preferred habitats they use throughout the year. These common and specific patterns can be seen in basic activities, for example, when fish feed, breed, aggregate and rest. Thus, it is important to understand all the processes that are associated with feeding activity, shelter usage and predator avoidance, as well as the environmental drivers affecting it. Having a basic understanding of the behaviors and habitats related to each fish species is essential to understanding the complex marine ecosystem and allows us to protect fish, maintain biodiversity and improve or restore the marine environment. This Special Issue presents an opportunity to explore this topic in more detail, recruiting papers that discuss marine fish habits in the natural environment and captivity, such as fish ecology, fish biodiversity, fish feeding, breeding and habitats.

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei  
Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean  
Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 15.6 days after  
submission; acceptance to publication is undertaken in 1.9  
days (median values for papers published in this journal in  
the first half of 2025).
