Abundance and Diversity of the Sea Fish Community

Message from the Guest Editor

Although there are a few common patterns of behavior that can often be related to various types of fish, each species has its own specific habits and preferred habitats they use throughout the year. These common and specific patterns can be seen in basic activities, for example, when fish feed, breed, aggregate and rest. Thus, it is important to understand all the processes that are associated with feeding activity, shelter usage and predator avoidance, as well as the environmental drivers affecting it. Having a basic understanding of the behaviors and habitats related to each fish species is essential to understanding the complex marine ecosystem and allows us to protect fish, maintain biodiversity and improve or restore the marine environment. This Special Issue presents an opportunity to explore this topic in more detail, recruiting papers that discuss marine fish habits in the natural environment and captivity, such as fish ecology, fish biodiversity, fish feeding, breeding and habitats.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
