Advances in Ship Design

Message from the Guest Editors

Up to now, ship design has played a pivotal role in realizing safe and efficient ships. Despite such importance, some of the processes of ship design are still carried out by hand, which acts as an obstacle to increasing productivity. In recent times, various technologies such as artificial intelligence and big data are being developed and, due to advances in these new technologies, ship design also has the potential to further develop. Therefore, this SI was proposed to allow us to share such content with each other. Any papers incorporating the latest technology and practice in addition to the traditional ship design theory are welcome, so I hope that excellent papers from interested researchers will be submitted. Please do not hesitate to contact us and Zara (zara.liu@mdpi.com) if you have any queries.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
