

Special Issue

Advanced Studies in Breakwaters and Coastal Protection

Message from the Guest Editors

Globally, the mean-sea-level rise has been accelerating, the population living in coastal zones has been gradually growing and the demands for deeper harbors have been fast-moving to accommodate deeper-draft vessels.

Certain areas around the world will also experience more frequent and intense extreme storm events, leading to increased structural damage, beach/dune erosion, flooding, amongst other processes. Different types of breakwaters have been very common for sheltering harbor entrances/basins against waves, as well as for preventing shoreline erosion. Adapted solutions have required that need to be safe and sustainable for the protection of coastal residents, ecosystems, coastal/harbor infrastructure and economy. This Special Issue welcomes original research on innovative methods and technologies for coastal and harbor structures, including the effects of climate change, focusing on advanced studies for upgrading the reliability of existing structures in terms of safety and functionality, for the optimal design of new ones and for improving measures to mitigate risks.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
