

## Special Issue

# Advanced Studies in the Autonomy and Control of Marine Vehicle Systems

### Message from the Guest Editors

Recent advances in marine robotics and autonomous systems have demonstrated their great potential to transform our ways of monitoring, intervening, exploring, and utilizing the marine environment, from the sea surface down to the deepest depths and furthest reaches of the oceans. The increased use of these intelligent platforms provides numerous benefits for humans in terms of improved efficiency, higher reliability, reduced operational cost, minimal risks, enlarged application scope, etc. This Special Issue is seeking high-quality original contributions: technical papers that address the main research challenges related to the autonomy and control of marine vehicle systems.

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei  
Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean  
Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 15.6 days after  
submission; acceptance to publication is undertaken in 1.9  
days (median values for papers published in this journal in  
the first half of 2025).
