Recent Developments in Coastal Benthic Ecology

Message from the Guest Editor

Today, the advances of benthic ecology have increased in the context of marine management and conservation faced with the intensification of human activities and the deployment of Marine Protected Areas. The available multivariate statistical techniques for identifying benthic assemblages can analyze a large database of quantitative data on benthic samples at different spatiotemporal scales. Coastal benthic communities are colonized by a lot of non-indigenous species, some of which alter the trophic network of such inhabited habitats. However, the main challenge is identifying the respective parts of the effects of climate change and the cumulative effects of human activities on the continental shelf in the functioning and temporal changes of the benthic habitats of this key ecosystem of the marine environment. All these new developments and knowledge around benthic habitats will serve as tools for users and managers to ensure the sustainable function of coastal benthic ecosystems.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
