

Special Issue

Beach Erosion and Protection

Message from the Guest Editor

Beach erosion is the process of loss or displacement of sediment and rocks along the coastline due to the action of strong waves, tides, currents, or other impacts of storms. These problems have been noted since the 1960s; however, there are no one-size-fits-all beach protection solutions because various beaches have different characteristics in different parts of the world. Both built structures (seawalls, artificial reefs, revetments, breakwaters) and natural elements (dunes, wetlands, reefs) are the features of a coastal community and are important for community safety and development, which provide a range of resilience to coastal communities. This Special Issue will focus on environmentally and user-oriented coastal protection works that depend on different beach characteristics to solve beach erosion problems and technically sound credible coastal protection work to address new challenges.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering (JMSE, ISSN 2077-1312)* is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
