

Special Issue

Marine Plastics

Message from the Guest Editor

Plastic debris of different dimensions have been observed worldwide in any sea basins, posing new scientific and technological challenges to the understanding of the complexity of their transport processes and the interplay between plastics and biota and to the design of remediation strategies. Despite great efforts devoted to understanding these aspects, several issues are still open. This Special Issue dedicated to Marine Plastics will consider for publication original scientific contributions that aim at deepening the following aspects: transport models of macro- and micro-plastics on both a regional and a coastal scale; field observations in border environments such as estuaries and lagoons; the role of micro-plastics as a transport vector for other pollutants and/or species; the role of biofouling on the transport of micro-plastics; observations of micro-plastics on the seafloor or in deep waters; ecotoxicology of plastic debris

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
