

Special Issue

State of the Art in Marine Robotics

Message from the Guest Editor

Marine robotics research aims to design, develop, and provide support to the operation of marine systems for scientific and academics research, as well as commercial applications. In this sense, marine robotics systems have emerged as standard tools to explore the ocean and to carry out many challenging tasks and missions. This Special Issue will provide a comprehensive overview of the state of the art of marine robotics. We invite research articles that will consolidate our understanding of this area. The Special Issue will publish full research papers and reviews about the latest experiments, applications, advances, and challenges in the field. Potential topics include, but are not limited to the following:

- Autonomous underwater and surface vehicles (AUVs, USVs), remotely operated vehicles (ROVs);
- Guidance, navigation, and path planning;
- Control, modeling, and simulation;
- Fault diagnosis and fault tolerance;
- Sensor networks, underwater sensing;
- SLAM, localization, and tracking;
- Cooperative surface and underwater vehicles;
- Machine learning methods for marine robotics;
- Communication systems;
- Applications, case studies, field trials, and experimental results.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
