Marine Oil Spills 2018

Message from the Guest Editor

Marine oil spills have received a great deal of attention again since the Deepwater Horizon spill in 2010. Since then, there has been extensive research on various aspects of oil spills. The purpose of the invited Special Issue is to publish the most exciting research with respect to the above subjects and to provide a rapid turn-around time regarding reviewing and publishing, and to disseminate the articles freely for research, teaching, and reference purposes. High quality papers are encouraged, for publication, directly related to various aspects, as mentioned below. Novel techniques for the study are encouraged.

- Topics—marine oil spills
- Fate and effects
- Analytical techniques
- Behavior and modeling
- Case studies
- Cleanup and countermeasures
- Effects on wildlife

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief
