## The Strategy of Smart Port

### Message from the Guest Editor

The smart concept has become an essential function for port organizations to act as intelligent hubs in the global transport network. Recently opened ports are making investments that enable meeting the conditions of smart ports. Ports are introducing ecofriendly energy sources, such as LNG and batteries, in place of diesel fuel. Automation terminals are being built to reduce operating costs and for safe operation. In addition, ports are dramatically changing the way information is gathered, analyzed, predicted, and optimized to accommodate the fourth industrial revolution. This SI aims to discuss all the prerequisites that must be prepared in advance to effectively build smart ports.

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
