

Special Issue

Frontiers in Fish Parasites

Message from the Guest Editors

In the last few decades, studies on fish parasites have increased with the growing importance of fishing and the global expansion of aquaculture. In fact, the rapid growth of the fishing industry has generated new challenges and opportunities in the prevention and control of parasites in fish, which have become essential to reducing negative impacts on large-scale production and supply. In addition, the implication of the spread of parasites in new environments by international transport, which has generated ecological and economic impacts, is an aspect of increasing importance. This Special Issue aims to provide an overview of the current research and advances in all aspects of marine and freshwater fish parasites. Original research or review articles are welcomed and potential topics include, but are not limited to: host-parasite relationships, taxonomy, molecular biology, ecological and evolution aspects, fish immune response to parasitic infection, diagnostic methods, disease prevention, new developments in the treatment of fish parasites in both freshwater and marine, wild and cultured fish.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
