Frontiers in Fish Parasites

Message from the Guest Editors

In the last few decades, studies on fish parasites have increased with the growing importance of fishing and the global expansion of aquaculture. In fact, the rapid growth of the fishing industry has generated new challenges and opportunities in the prevention and control of parasites in fish, which have become essential to reducing negative impacts on large-scale production and supply. In addition, the implication of the spread of parasites in new environments by international transport, which has generated ecological and economic impacts, is an aspect of increasing importance. This Special Issue aims to provide an overview of the current research and advances in all aspects of marine and freshwater fish parasites. Original research or review articles are welcomed and potential topics include, but are not limited to: host-parasite relationships, taxonomy, molecular biology, ecological and evolution aspects, fish immune response to parasitic infection, diagnostic methods, disease prevention, new developments in the treatment of fish parasites in both freshwater and marine, wild and cultured fish.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
