# Optimization and Energy Maximizing Control Systems for Wave Energy Converters II

### Message from the Guest Editors

Wave energy is now an established research field, and the scientific community focuses on reducing the capital cost associated with the design and construction of wave energy converters (WECs) while maximizing their performance and durability in real working conditions.

Research challenges on WECs contemplate the application of well-known control and optimization techniques to highly nonlinear and multiple degrees of freedom dynamic systems. We would like to invite papers on the topic of “Optimization and Energy-Maximizing Control Systems for Wave Energy Converters II”. This includes but is not limited to optimal design and control-informed optimization algorithms applied to WEC systems and array, model-based and data-driven novel energy-maximizing control strategies for WECs, numerical results and experimental tests proving the achievements of specific control architectures, specific challenges of the WEC application case, including strong nonlinearities (nonideal and saturated power take-off, hard-stop mechanisms), extreme condition handling (large motions and forces), and accurate estimation and forecasting of WEC input and states.

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

Oceans Graduate School and The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

---

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
