

## Special Issue

# Coastal Morphology Assessment and Coastal Protection

### Message from the Guest Editor

Owing to proliferation of development acts by human beings, coastal erosion has been a serious problem on many beaches in the world. Furthermore, owing to industrial activity activated too much by human beings, aggravation of natural disaster resulting from global warming is growing into a realistic problem. Therefore, research on coastal erosion and coastal disaster prevention is increasing in importance much more. In this Special Issue, in order to contribute to the advance of technology of this field, in addition to the research on coastal erosion and disaster prevention resulting from large waves, a high tide, and a tsunami, research results about phenomena concerning coastal preservation, measures, coastal structures, case studies, etc. are invited widely. This Special Issue will provide a rapid turn-around time on reviewing and publishing, and the articles will be freely available for research, teaching, and reference purposes.

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
