Coastal Morphology Assessment and Coastal Protection

Message from the Guest Editor

Owing to proliferation of development acts by human beings, coastal erosion has been a serious problem on many beaches in the world. Furthermore, owing to industrial activity activated too much by human beings, aggravation of natural disaster resulting from global warming is growing into a realistic problem. Therefore, research on coastal erosion and coastal disaster prevention is increasing in importance much more. In this Special Issue, in order to contribute to the advance of technology of this field, in addition to the research on coastal erosion and disaster prevention resulting from large waves, a high tide, and a tsunami, research results about phenomena concerning coastal preservation, measures, coastal structures, case studies, etc. are invited widely. This Special Issue will provide a rapid turn-around time on reviewing and publishing, and the articles will be freely available for research, teaching, and reference purposes.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
