Advances in the Innovative Coastal and Offshore Structures

Message from the Guest Editors

Offshore structures have been mainly constructed for the oil and gas industries. However, many innovative offshore structures are being actively developed. The concept of smart ports and its application is being suggested worldwide. Smart disaster prevention structures are needed against unexpected natural disasters in coastal regions due to the global climate crisis. To enhance the structural safety and operability of various innovative coastal structures, we should first investigate and understand the structural behavioral characteristics of the structures based on rational research methods and procedures. We develop effective design, analysis, optimization, monitoring, and maintenance methods. We invite you to submit original work in areas including but not limited to:

- Development of innovative coastal structures
- Offshore renewable energy facilities
- Offshore floating transportation infrastructures
- Smart disaster prevention structures in coastal regions
- Structures for smart ports
- Effective design and analysis methods for coastal structures
- Effective smart monitoring technologies for the coastal structures

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
